

DAISY II – Radio Module

Part No. 66 310

To install the radio module you need the manual from your DAISY II Hand Controller. In Chapter 8 there is a description on how to open the Hand Controller and inserting the Radio Module.

Should the batteries need to be replaced or they are no longer in their mounting location, then take care of the polarity when reinstalling them (see the sketch on the back).

After installing the Radio Module the batteries can be charged via the Center's LocoNet or with the enclosed charger.

For charging with the enclosed charger a transformer power of 12 - 16V~ is connected to the screw terminals of the charger and LocoNet cable connected with the Hand Controller. In this configuration no other devices should be connected to the LocoNet (e.g. via LocoNet distributor).

During charging the hand controller will warm up slightly. Fully discharge batteries will require a charging time approx. 1 hour.
